ABOUT ME

I am currently the head of [Inception3D](#). I obtained my Ph.D. at Chinese Academy of Sciences (ShanghaiTech) Visual Intelligent Center (VIC) in 2022, working with [Prof. Jingyi Yu](#). Before that, I received my Bachelor degree in 2016 from Xidian University. I was a visiting scholar at [Hao Su's Lab](#) and [ELLIS](#) Postdoc jointly supervised by [Prof. Andreas Geiger \(University of Tübingen\)](#) and [Prof. Siyu Tang \(ETH Zürich\)](#).

My **research interests** lay on computer graphics, computer vision, and spatial intelligence, encompassing areas such as visual representation learning, 3D reconstruction & generation, and physics, with the goal of efficiently understanding 3D from 2D. I have a great passion for new things and ideas; my goal is to create magic and happiness. My previous work has received notable accolades, including the Runner-Up for Most Influential Paper at ECCV 2022 and the Best Student Paper Award at CVPR 2024.

ACADEMIC EXPERIENCE

WINTER 2020 1 YEAR	Research Assistant at UCSD SU LAB Advisor: Hao Su and Zexiang Xu Working on multi-view stereo reconstruction and neural rendering. More specifically, our goal is to design a fast generalizable radiance field reconstruction from Multi-View Stereo that we can reason new scenes just from a few sparse image samples.
WINTER 2018 4 MONTHS	Intern at DISNEY RESEARCH LA, <i>Lab Associate</i> Mentor: Kenny Mitchell Worked on global illumination rendering and human-to-cartoon body reconstruction system. More specifically, attempt to speed up path tracing process via optimizing the light path sampling algorithm according to its' temporal ray samples. I also took part in a human-to-cartoon project and in charge of recovering dynamic facial wrinkles. We submitted two patents during the internship.
SUMMER 2016 3 MONTHS	Intern at DGENE, <i>Engineer</i> DGene Worked on virtual reality device, object reconstruction and rendering. Stereo Video player on HTC Vive, fast refocusing algorithm with RGBD panorama input. And preparing a demo of digitalis products (Tang San Cai, bottle and handBag etc.) for Alibaba Buy+Act . Our solution is demonstrated on the conference due to its' high data compression performance (2000 : 1) and we also published a paper on I3D'18.
